Skills

- React | JavaScript | TypeScript | Next.js | Vue | Nuxt.js | Redux | jQuery | MySQL | Git | GitLab | GitHub | Gulp | Figma | Cypress
- CSS | HTML | SASS | SCSS | Tailwind | CI/CD | Bootstrap | Frontend Development | pnpm | npm | yarn | Google Cloud Platform
- C | Vite | Jira | RESTful API | Webpack | Docker | Django | MySQL | Python | SQLite | MongoDB | PostgreSQL | Testing Frameworks
- Microservices | Distributed Systems | Accessibility | Performance Optimization | Responsive Design | SEO | SaaS | AWS | Terraform
- English, Russian, Lithuanian – All professional proficiency or above

Experience

Co-Founder & Front End Engineer

Panda Bash

Kirkland, WA - Remote 07/2024 - Current

- Architected & developed an events management platform in **React (Vite), TypeScript, Firebase (Firestore, Auth), and Cloudflare Workers**.
- Implemented a secure authentication process with **Firebase Authentication** that incorporated email-based admin access management.
- Integrated **Square Payments API** with real-time transaction processing, dynamic calculation of state taxes & fees, client-side card validation and webhooks for payment receipt and email receipt.

Software Engineer – Front End

Itential

Atlanta, GA - Remote 11/2021 - 05/2023

- Led the front-end development and participated in the design of 2 enterprise-level microservice applications, taking part in driving Itential's revenue to reach its peak of \$25.0 million in 2023 using the latest technologies of **React, React Charts, Emotion, SCSS, JavaScript, and TypeScript**.
- Optimized user experience for engineers at Itential, resulting in a 45% improvement in page load and a 75% reduction in bug reports
- Took responsibility for many applications used by Fortune 500 network engineers ensuring smooth migration with minimal downtime.
- Collaborated on developing a **Swagger** file differentiation tool, enhancing the accuracy of the interface updates in the Itential Automation Gateway and Itential Cloud Automation. This upgrade to the auto-generation engine resulted in a 40% reduction in manual interface adjustment and a 60% lower error rate in the new feature integration.
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load/stress testing, unit/integration/e2e testing.

Front End Developer, Contract

Minority Programmers Association

Washington, D.C, USA - Remote 04/2021 - 07/2021

- Designed the development and deployment of a **Next.js** microservice utilizing **Tailwind CSS** for a streamlined user interface, enhancing the efficiency and maintainability of the MPA's Mentor to Student search, communication, and teaching service.
- **Reported directly to CTO:** Assisting the development of different projects with current interns, as well as testing the production code.

Front End Developer, Contract

Evergreen Athletics

Woodinville, WA, USA 11/2018 - 11/2021

- Built, hosted, and managed a business website that increased the volume of new customers to the gym by more than 300%.
- Developed the User Panel as well as the Admin Panel for future maintenance using **HTML, CSS, and JavaScript on SportsEngine**.

Web Developer, Intern

Visaginas Sports Center

Visaginas, Lithuania 01/2018 - 07/2018

- Joined a team of two Senior Developers to perform daily tasks of managing the website, reducing bug reports, and learning best practices in **HTML, CSS and JavaScript jQuery**.
