## Software Engineer (Frontend-Leaning Full Stack)

 [LinkedIn](#) |  425-625-1273 |  [ymmy1.github.io](#) |  [oleg.ymmy@gmail.com](mailto:oleg.ymmy@gmail.com) |  Seattle, WA

### About

Frontend-leaning full-stack engineer focused on shipping production **React, Next.js, and TypeScript** applications end-to-end — **UI, REST APIs, payments, authentication, and cloud infrastructure** on **AWS, GCP, and Cloudflare Workers**. Enterprise SaaS background with hands-on **founder experience** building and operating products solo.

### Skills

- **Frontend:** React, Next.js, Vue, Nuxt.js, Vite, TypeScript, JavaScript, Redux, Tailwind, SCSS, HTML, CSS
- **Backend & Cloud:** Node.js, Python, REST APIs, Firebase, Cloudflare Workers, AWS, GCP, Terraform, Docker, CI/CD, Git
- **Data:** PostgreSQL, MongoDB, Firestore, Cloudflare D1, MySQL, SQLite
- **Testing & Tools:** Cypress, Jest, Unit / Integration / E2E Testing, Webpack, Figma, Jira
- **Other:** Square Payments, Amazon SES, Microservices, Performance Optimization, Responsive Design, Accessibility

### Selected Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                            |                                  |                          |
